About Me

I am a skilled front-end developer with 2 years of experience in building responsive and accessible websites and applications. With a deep understanding of HTML, CSS, and JavaScript, I am constantly striving to stay up-to-date with the latest web technologies and trends. My expertise in front-end frameworks such as React has allowed me to develop robust and scalable applications that meet the needs of clients and end-users alike.

Technical Skills

- HTML
- CSS
- JavaScript
- React Js
- Next Js
- Firebase
- TailwindCss
- Sass
- Redux Toolkit
- TypeScript
- Figma
- Git
- Github

- Ability to learn new technologies and programming quickly.
- Experience working with SEO optimization techniques and best practices.
- Familiarity with server-side rendering (SSR) and static site generators (SSG).
- Ability to translate UI/UX designs and mockups into clean and responsive code.
- Understanding of front-end development best practices, including accessibility and performance optimization.
- Knowledge of version control tools like Git and GitHub.
- Ability to write clean, modular, and reusable code.
- Experience with CSS preprocessors such as SASS
- Familiarity with Agile development methodologies
- Excellent communication and collaboration skills for working in a team environment.
