

YAQUB NAQIB

Frontend Developer — React / TypeScript

Erbil, Kurdistan Region, Iraq | yaqub.nq@gmail.com | +964 750 829 9544
yaqwb.vercel.app | github.com/Yaqub-naqeb | linkedin.com/in/yaqub-naqib-b9894b238

PROFESSIONAL SUMMARY

Frontend Developer with 3+ years shipping production e-commerce and SaaS. Strongest on React, TypeScript and React Router: SSR loaders, trilingual RTL UIs, Laravel API integration, payments and performance on real customer traffic.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3, SQL, Python

Frontend: React, React Router (Remix), Next.js, Vue.js

Styling & UI: Tailwind CSS, Radix UI, Sass/SCSS, Bootstrap, Responsive Design, i18n / RTL (i18next)

State & Data: Jotai, Redux Toolkit, React Context API, Zod, REST APIs, Firebase, Laravel Echo

Backend & Integrations: Node.js, Django, Django REST Framework, MySQL, Mapbox, Meta Graph API

Tools: Git, GitHub, Vite, Webpack, Vercel, Lighthouse, Sentry, Agile/Scrum

PROFESSIONAL EXPERIENCE

Frontend Developer — [iZone Iraq](#)

Apr 2024 – Present | Erbil, Iraq | Full-time, On-site

- Own the TypeScript frontend for a multi-brand commerce platform (iZone, OneStore, Apple Zone, Mantika, Strap Iraq) serving 15,000+ monthly users, built with React Router, server-side loaders and a Tailwind CSS design system shared across all five brands.
- Ship English, Arabic and Kurdish with full RTL support and currency-aware catalogue pricing against a Laravel API, so one codebase serves every regional storefront without duplicated UI.
- Reduced Largest Contentful Paint on catalogue and product routes from 3.8s to 1.4s with route-level code splitting, below-the-fold lazy loading and product-image preloading.
- Built checkout and payments end-to-end: Mapbox address capture, wallet top-up and First Iraqi Bank QR payments with status polling, session recovery and full error-state coverage.
- Delivered Digital Cards (online prepaid cards for gaming, iTunes and similar), IMEI device lookup, live FX rates and community Q&A on the same platform, gated by server-driven feature flags.

Frontend Developer — [Botolon](#)

Nov 2023 – Apr 2025 | Erbil, Iraq | Contract, Remote

- Engineered the web client for a chatbot automation platform serving 50+ business accounts, built with Next.js, Sass and the Meta Graph API.
- Implemented a visual conversation-flow builder and analytics dashboard with drag-and-drop state management for multi-step automation sequences.
- Established a shared component and layout library standardising forms, tables and modals across the product.
- Sustained sub-100ms interaction latency under live message volume via list virtualisation, React memoisation and debounced API polling.

SELECTED PROJECTS

[ErbilianWay](#) — Vue.js, Bootstrap, Laravel | erbiliantravel.com

Travel booking platform for an Erbil tour operator; built the responsive frontend and booking-enquiry flow against a Laravel API.

EDUCATION & CERTIFICATIONS
